

## Trump Attacks on Healthcare in California Endanger Millions

**Seniors** will soon find out about their premiums rising beyond rates of inflation in 2026. Comprising 11% of the CA population, *4.36 million* seniors aged 65+ are among the most vulnerable members facing these attacks on healthcare.

In CA, while comprising 39.4% of the state's population (15.6 million), 40% of **Latinos** are on some kind of Medicaid healthcare. With Trump's cuts, that means that soon, over *6 million* face reductions or denial of healthcare.

The same goes for many [Asians and Pacific Islanders \(APIs\) in CA](#). We comprise roughly 18 percent of CA's population (39,663,800 x 0.155=) and 9.3 percent of California's [Medi-Cal population](#). That's **3.69 million APIs** that will be impacted by Medicaid cuts (called "[Medi-Cal](#)" in CA).

**African Americans** in CA number **2.17 million**, comprising **5.54%** of the total population. [More than 1 million of them will be impacted by the Medicaid cuts alone.](#)

As of September 2023, approximately [55,000 Medi-Cal members identified as American Indian and Alaska Native](#). In addition, the Project 2025 cuts will further accelerate rural hospital closures, which is likely to impact persons needing to travel outside of existing reservations for healthcare services.

# Principles of Calcare

- Everybody in, regardless of race, sex, gender, country of origin, disability/migration/marital status, age or income
- Medical debt will no longer be the #1 cause of bankruptcy

- Health insurance no longer tied to employment
- No more health group health insurance plan hassles for small businesses and non-profits

- Includes medical, dental, hearing, vision, mental health, prescription drugs, long-term care for seniors and more

- Includes capital investment to directly address healthcare disparities. E.g. bilingual/bicultural healthcare will no longer be ignored and denied due to profit-motives of private insurers

- No more rising premiums, co-pays and deductibles

- No more tiered healthcare service quality

- No more private networks restricting choice of doctors
